

How to Order Decorative Wire Grille:

1. Determine the style and color of grille.
 - If ordering style MD11, you must indicate if you would like the panels cut so the pattern is vertical or horizontal.
2. Determine size and quantity of each door panel insert.
3. Order the number of sheets you think are required to create your panels.
 - ½ sheets can be ordered to avoid excessive waste.
4. Once the order is received, we will lay out your design to determine the number of panels that can be cut from each sheet and will advise you if the number of sheets you ordered will accommodate the required cuts.
 - Things that can affect how many panels can come from a sheet:
 - ♦ Panels must be centered on the pattern so all corners are cut the same.
 - ♦ We need at least 1" between each panel on all sizes. Depending upon the grille chosen, we may require more space for cutting.
 - ♦ Pattern MD11 can be cut so openings are either vertical or horizontal and this may affect spacing and number of panels.
5. Please indicate if you would like the excess material sent with your order.

When you receive the Decorative Wire Grille:

1. Please note, edges are VERY SHARP - be careful when opening package and removing wire from board.
2. Keep wire panel on board until ready to install.
3. Panels are NOT welded together so the panel can accordion in or out. If you find that the panel is too small or too big, simply pull or push the panel from the sides to get to your appropriate panel size.
 - Please note: we cut the panels according to the size indicated on your order, during shipment, the panels may move and should be checked upon receipt.
4. If necessary, material can be cut using tin snips, wire cutters, bolt cutters and any saw with a metal cutting blade, depending on the gauge of the wire. Each design varies with wire gauge and crimp style.
5. To assemble, simply screw the wire grill into place or secure with moulding strips, tabs or clear glue.
6. Decorative wire grilles and chicken wire can be cleaned easily with any NON-AMMONIA based cleaners.
